We are manufacturers of teeth whitening products. Quality is a great concern for us and we believe in developing lasting partnerships with new distributors.

The complex **Fitoximineral** white active oxygen free slow-release, which removes stains from tea, coffee and nicotine restoring the natural whiteness of teeth. Furthermore, the copolymer present in the formulation, form a light film that wraps around the tooth surface, preventing the salts of phosphorus and calcium being deposited on the teeth, thus preventing the formation of tartar.

It is a technology to whiten teeth thanks our non abrasive formula that works fast to deliver a whiter looking smile.

Due to the properties of active oxygen, it whitens the enamel on the surface eliminating bad breath and reducing gum inflammation
Active oxygen free slow-release properties for the visible result.

The complex **Fitoximineral** white free over active oxygen, also Fluoro slow release.

This translates into a greater contact time between the ion Fluorine and dental surface, leading in turn to a dental remineralization.

It can be used as per usual, and with electric tooth brushes.

Our Whitening Toothpaste whit Filoximineral gives bright teeth and removes stains such as, tobacco, coffee, tea and other stains to their original whiteness.

Perltn whit Fitoximineral whit proven whitening agent gently remove stains and plaque. As a result a smile shines
